To be sure of getting your plants while you are here we should have your order in advance of your coming so we can have them ready for you, as we may not be able to dig the stock while you are here.

Business Information

NOT OPEN ON SUNDAYS. We do not have help to dig stock on Saturdays but if you want to pick up stock on Saturday let us know long enough in advance so we can have it ready for you. Closed 11: a.m. Saturday to Monday morning.

THESE PRICES are in effect Fall 1963, Spring 1964.

ALL OUR STOCK is fresh dug for each order. None of it is in storage except strawberry plants.

PRICES named in this Trade List apply only to orders placed by nurserymen, florists, and dealers. Maryland customers are subject to 3% sales tax or send your License Number. All delivery costs are to be paid by purchaser.

PACKING. Boxes and bales will be charged costs of material and labor used. We will add this cost to your invoice. **This cost applies whether you remit with order or buy on time terms.**

CLAIMS, if any, must be made immediately upon receipt of goods, and if just, made satisfactory, but in no case are we responsible for more than the purchase price of the stock in question. **We will not be responsible for failure to fill orders in full or for any damage or delay to stock after delivery to the transportation company. Claims not made within ten days cannot be honored.**

TERMS. Net, no discount or net 30 days from date of shipment to those of known responsibility but must have satisfactory business references from others or remittance must accompany order. Those desiring stock shipped C.O.D. will please remit one-fourth the amount of their purchase when ordering. Other terms by special arrangement. 1% per month interest will be charged if not paid when due.

NON-WARRANTY. We give no warranty, expressed or implied, the purchaser assuming all risk and responsibility of transportation, growth, planting, life of stock or any other matter on any stock we sell. We send out good stock, carefully grown and packed but cannot control conditions after it leaves our care. We exercise the greatest care to keep our stock true to name and are willing to replace on proper proof any stock that may prove otherwise, or refund the amount paid us for such stock, but it is mutually agreed that we shall not at any time be liable for any greater amount.

TELL US HOW TO SHIP, whether by express, motor truck, or parcel post. If by motor truck, tell us the route or over which line you want delivery made. If you do not give this information we will use our own judgment as to route and methods to use. It is mutually agreed that whether you name the route or leave it to our own selection, we will not in any way be responsible for time or condition of delivery and our responsibility ceases upon our delivery to the transportation company.

HARDINESS OF PLANTS. When hardiness of plants is mentioned herein it applies to this section.

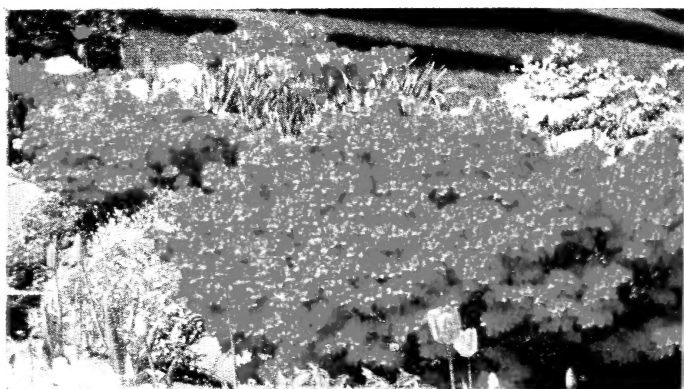

TIME OF SHIPMENT. We ship most every week in the year with the possible exception of during the winter when bad weather makes it impossible. Of course, there is a regular season for shipping the different plants, but if you want them out of season and are willing to take the risk of good delivery, we will pack with the utmost care and get them off to you at most any time you want them. Risky shipping in hot summer.

Plan to Visit Our Nursery

We will certainly be glad to have you come to see our stock for yourself. We believe you will find it compares favorably with that grown by other nurseries. Some of our customers have told us it is better than is furnished by some others. We are on the Eastern Shore of Maryland, 100 miles south of Wilmington, Delaware, 100 miles from Kiptopeke-Norfolk, Va., ferry, 90 miles from Annapolis, Md., via Chesapeake Bay Bridge, 150 miles from Baltimore, Md., via Elkton, Md., 225 miles from New York, N.Y. We are on U.S. Route 50, 10 miles east of Salisbury, Maryland.

ACER—ASIATIC MAPLES

We believe the following is the largest collection of Asiatic Maples being offered to the trade at wholesale prices by any grower.

2 yr. and 3 yr. grafted plants at \$2.50 each, five of a variety at \$2.25 each.

Our stock of these is limited and orders will be accepted only as long as stock lasts.

ATROP. YEZO-NISHIKI. Blood-red leaves with vermillion variegations.

ATROP. NOMORA-NISHIKI. Dark red leaves with brown and light variegations.

ATROP. DISSECTUM. Blood-red leaves delicately cut, feathery like, weeping branches and graceful.

ATROP. DISSECTUM MIOUN. New. Very good. Red leaf.

DISSECTUM PALMATIFIDUM. Green leaves delicately cut, weeping.

DISSECTUM WATERFALL. One of the best green cut-leaf varieties.

AOYAGI. Yellowish green palmate leaves.

AUREA-VARIEGATUM. Green leaves with yellow and yellowish-green variegations.

KOSHIMINO. Green narrow leaves with cut, several leaves spouted from one leaf-stalk.

OKUSHIMO. Deep green palmate leaves with up-curved edges.

OSAKADZUKI. Large palmate leaves, yellowish light green, changing to blood-red in autumn.

RETICULATUM. Palmate leaves yellowish white with green veins appearing very distinctly, showing net work.

ROSEUM. Green leaves with occasional deep-pink margin.

ROSA-MARGINALIS. Small green leaves, showing a pink margin as the tree becomes of size.

SCOLOPENDRIFOLIUM. Green leaves cut to center, narrow leaflets.

VERSICOLOR. Green with white, pink and light green variegations.

YATSUFUSA. Very small palmate leaves.

JAPONICUM-JUNIHI TOE. Light green leaves, obtusely cut.

The following are 2 year grafts. Very scarce varieties. Not sufficient description to note at \$3.00 each. Very limited.

Agono Sarasa, Aocha Nishiki, Harasume, Hogyaku, Ornata, Sangokaku, Tsukahone, Nou Nishiki, Itayo.

The following are 1-year grafts at \$3.00 each. Very limited quantities and small. Not sufficient description to note.

Marakuma, Matsukaze, Ogono Magure, Ogono Sarosa, Yog Zaku, Yugura, Japonica Aureum, Japonica Filicifolius.

RED LEAF JAPANESE BARBERRY

(Berberis Thunbergi Atropurpurea)

We have a very nice lot of Red Leaf Japanese Barberry in lining-out sizes. Last season did not have near enough to fill our orders for this but have a larger stock this season and will appreciate your orders for it.

SYRINGA MICROPHYLLA SUPERBA

A new variety of *Syringa microphylla* named *superba*, is said to flower again in early Fall, but primarily it is Spring-flowering. The flowers have the same fragrance as the *Daphne*, which gives it the popular name *Daphne Lilac*.

Syringa microphylla, itself, is distinctive for its very small leaves, less than an inch in length, and quite orbicular. The species is called *Littleleaf Lilac*. This is a small shrub, 4 to 5 feet in height. The plant is graceful, with slender stems. The flowers are in loose trusses, with main ones at the top of stems, and smaller ones along the branches. The entire plant in flower is like a huge bouquet, pleasing and novel. They bloom a little later than the popular hybrids, at the end of May, or in June, and are highly rated by the authorities. Red in the bud, they open soft pink, and bloom freely. This is a new hybrid, and not yet found in many nurseries. See *Lilac* page 28.

GINKGO PYRAMIDALIS

The variety named *Pyramidalis* may be in leading branches so close together as to make it impossible to thrust ones fingers between them. This is certainly one of the best pyramidal trees grown. The variety *Autumn Gold* has been selected and so named for its brilliant gold color in the autumn. The *Mascula* or male is a broader growing type minus the fruiting which is so objectionable. See page 17.

TREE PEONIES

Because of their novelty and great beauty, Tree Peonies are rapidly becoming one of the most desired plants. They bloom earlier than ordinary Chinese Peonies and their flowers are of immense size. Prices are per each plant.

Price per each 5" pot.

AUNT MARY'S SWEET CORN

The Sweet Corn Supreme

This is the most wonderful Sweet Corn we have ever grown. One grower describes it as "the best Sweet Corn in the world."

Has the most delicious flavor and keeps a long time before becoming too hard to use. In fact, usually requires artificial heat to cure it for seed purposes.

Aunt Mary's Corn, by its excellent quality, sweetness, and flavor makes a stronger appeal to the Corn-loving public than most any other variety and that appeal continues long after you are tired of other Sweet Corns.

Liberal size packets, 35c each; 3 for \$1.00, postpaid.

\$2.00 per pound, postpaid.

If after growing this wonderful Sweet Corn you are not entirely satisfied, we will refund every cent you paid us for it.

A FASCINATING HOBBY

Growing Azaleas is a hobby which provides an ever increasing source of interest. There are so many species to be had and so many almost breathtaking new hybrids being produced, that one is amazed at the magnificent display that we may have with only a small space of ground and a few of the newer plants that are now being offered. If you want a stimulating (and profitable) hobby that grows more interesting, beautiful and valuable every year, then grow azaleas.

Many items in this catalog will undoubtedly be sold out before the season is over. We suggest you place your order as early as possible.

CYTISUS BATTANDIERI

A splendid tall shrub, perfectly hardy. The olive-green shot silver leaves are like a Laburnum and the flowers are in cone shaped clusters, which in summer have a scent of ravishing sweetness reminding one of pineapple. The upstanding racemes of bright golden-yellow pea flowers are indeed a beauty to behold.

Our 3-year seedlings bloomed this past season and we are very favorably impressed with it. We have been selling all we can grow and only have the following to offer this season: 1 yr. seedlings 12 to 15 in. at \$5.00 per 10, \$35.00 per 100; 18 to 24 in. at \$1.00 each, \$7.50 per 10, \$50.00 per 100.

DAVIDIA INVOLUCRATA—DOVE TREE

Dr. Ernest H. Wilson describes the Dove Tree in his book "Aristocrats of the Garden" as follows: "The distinctive beauty of the *Davidia* is in two snow-white connate bracts which subtend the flower proper. They are always unequal in size—the larger six inches long by three inches broad, and the smaller three and one half inches by two and one half inches; they range up to eight inches by four inches and five inches by three inches. At first greenish, they become pure white as the flower matures, the flowers and their attendant bracts are pendulous on fairly long stalks, and when stirred by the slightest breeze they resemble large butterflies or small doves hovering amongst the trees and are so freely borne that the tree from a distance, looks as if flecked with snow."

This is undoubtedly one of the most interesting trees grown. We have been unable to accumulate any sizeable stock, the interest being so great for it. Last season we sold over 400 with only the name and price in our price list. This season we have about 1000, probably again will not have enough. Our price is very reasonable considering the scarcity.

TELL US HOW TO SHIP, whether by express, motor truck. If by motor truck, tell us the route over which line you want delivery made. If you do not give this information we will use our own judgment as to route and methods to use. It is mutually agreed that whether you name the route or leave it to our own selection, we will not in any way be responsible for time or conditions of delivery and our responsibility ceases upon our delivery to the transportation company.

Why not offer your customers more of the newer plants? You can make more profit than with the older varieties. Many new varieties are in this list.

We are having a very marked increase in sales of Flowering Crabs the past few seasons. Are you using them?

The Rare Franklinia

Each twig develops at its tip a cluster of buds of graduated size, like overgrown greenish pearls. Early in August the largest of these attain the size of marbles. Then the guard petal folds back, still retaining its firm spherical form. From this shelter emerges four other petals, satiny, snowy white, elaborately frilled and pleated. The snowy, frilly chalice, three inches in diameter, holds a sumptuous mass of orange-gold stamens and breathes forth a delicate, balmy fragrance.

Each flower lasts two or three days and then drops cleanly. There is a constant succession of blooms till hard frost. We frequently get the unusual effect of a tree clad in crimson, autumn foliage and abundantly starred with white flowers.

The Franklinia begins blooming when not more than 3 or 4 feet high. Young trees under favorable conditions increase in height a foot or more each season. Specimens 30 feet high are known. It develops naturally with several trunks, but may easily be trained to a single trunk by removing the sprouts which start from the base.

Franklinia prefers full sun, has proved entirely hardy about New York and hardy in favorable locations about Boston, Mass., and in Ohio.

We have found the Franklinia does much better if it has plenty of moisture at planting time. See color picture 4th cover page.

HOLLY (Ilex)

For many years we have been urging nurserymen to grow more holly. Fifteen years ago there was not very much demand for holly. If you will refer to our catalogs about that time and since, you will find we said, "The nurseryman who will grow a collection of Hollies to a specimen size will have something he can sell, whether times are good or whether they are bad. There is always a demand for them, and there will be as long as any other plants will sell."

Try to buy nice holly now, see how scarce it is. We find demand increasing each season

AQUIFOLIA FEMINA. The cuttings in this lot were taken from trees when not in bloom or fruit, but are from named varieties. A very good selection and buy, if not particular in having the variety named. Berry bearing.

3 in. pot plants 2 yr. \$4.00 \$30.00

AQUIFOLIA J. VAN TOL. Another form of English Holly with dark green leaves and occasional teeth. Berries are deep red, large, and showy. Heavy fruiter. One of the best. Probably the best for here in the East.

MALUS — FLOWERING CRABS

The Flowering Crabs are among the most charming of spring trees. They are not only beautiful when in blossom but many carry most ornamental and richly-colored fruit in the autumn. Most of the Crab family form graceful garden trees of medium size. They are quite hardy and require no particular cultivation, thriving best in a good loam and full sunshine.

SYRINGA PALIBINIANA

This dwarf lilac from Korea must surely rank as one of the finest deciduous rock garden shrubs to come to us from the Far East.

Syringa palibiniana has much to commend it. Given a light, leafy soil with good drainage and a sunny position it will thrive and take many years to reach an ultimate height of about 3 ft. The sweetly-scented, pale mauve sprays are produced abundantly in late spring, and it makes an ideal shrub for pot cultivation in the alpine house.

In spite of such virtues, *S. palibiniana* is still a comparative rarity in gardens.

This nursery was started just 58 years ago by the present owner. We have made many mistakes but we believe our customers will agree that we have always tried to give a dollar in value for every dollar received. This will be our aim as long as The Tingle Nursery Co. stays in business. If you have any reason for complaint, tell us.

TAXUS (Yew)

The Taxus are undoubtedly the most popular and useful of all the ornamental evergreens. We have been growing them extensively a good many years and the demand keeps increasing.

We honestly believe you will do well to plant and grow on some of these Yews.

Baccata adpressa. A compact Yew growing 4 to 5 feet high, with upright branches and dark green foliage.

*10 to 12 in. trans.	\$3.00	\$25.00
*12 to 15 in. trans.	3.50	30.00

Baccata aurea (Golden English Yew). Leaves golden yellow, more brightly colored at tips and margin. Hardier than type.

* 8 to 10 in. trans.	\$3.50	\$30.00
---------------------------	--------	---------

Baccata Dovastonii aurea pendula. A golden variegated form with drooping branches.

* 6 to 8 in. trans.	\$3.00	\$20.00
* 8 to 10 in. trans.	3.50	25.00

Baccata Elegantissima. A vigorous form of dense and compact habit, occasionally more open, with the young leaves striped yellow, the older ones with whitish margin.

*10 to 12 in. trans.	\$3.50	\$30.00
---------------------------	--------	---------

Baccata Gracilis Pendula (Ramshorn Yew)

Upright grower, branches curved like a ramshorn.

*12 to 15 in. trans.	\$4.00	\$35.00
---------------------------	--------	---------

Baccata hibernica (Irish Yew). A strictly fastigate form, with stout crowded upright branchlets; leaves radially arranged around the branches, dark glossy green, more obtuse than in the type. One of the most desirable evergreens of columnar habit for formal gardens. Do not recommend planting north of Philadelphia.

* 6 to 8 in. trans.	\$3.00	\$20.00	\$175.00
* 8 to 10 in. trans.	3.50	25.00	

Baccata repandens (Spreading English Yew). A low form with wide spreading branches and dull bluish green, narrower and longer leaves, partly falcately curved upward. Hardy in New England and one of the best spreading types. Nobody seems to have enough of these the past few years.

* 8 to 10 in. trans.	\$3.50	\$30.00
---------------------------	--------	---------

Cuspidata (Spreading Japanese Yew). For any and every purpose in which evergreens are required the Japanese Yew can be recommended. Immune from most diseases and pests. Withstands shade or full sunshine. Dark green at all seasons of the year. Grows broader than tall.

MORE HATFIELD YEWS

The following varieties were grown from stock purchased from the late T. D. Hatfield. He selected these as being the best of his unnamed varieties and we are still carrying them under his original numbers. We are giving brief descriptions.

Media Hatfield No. 2. Real dark foliage, upright grower; very dense; needles medium length. Very good.

	Each	10	100	1000
* 8 to 10 in. trans.		\$3.00	\$25.00	
* 10 to 12 in. trans.		3.50	30.00	

Hatfield No. 6. Somewhat like No. 8 in growth but twigs are not as heavy; leaves narrow. Very graceful.

For Connoisseurs

MAGNOLIA WILSONII

A deciduous shrub or small tree, *Magnolia Wilsonii* makes a striking picture in May and June with its large white, pendulous flowers and prominent rosy-purple stamens. The flowers are fragrant and this native of China gives of its best when planted in partial shade, where it will receive some protection from late frosts, which may spoil the splendid blooms. See page 29.

STEWARTIA PSEUDOCAMELLIA

The cup-shaped, creamy-white flowers with attractive orange-yellow anthers are freely borne in July and August—a period when most flowering shrubs are past their best—and an additional attraction is the autumn colouring when the foliage assumes brilliant red and yellow tints. Introduced from Japan in 1874, it is still rarely to be found in gardens although it is hardy enough. Its ornamental value has long been appreciated, however, for it received a first class certificate when shown before the Royal Horticultural Society. See page 38.

Azaleas

Sizes of azaleas are as follows: 2 in. pot plants are a rooted cutting grown in the pot one season, 2 yr. size grown one year in pot and one year in field beds, 3 yr. size have been grown in pot one year and field beds two years and 4 yr. size grown in pot one year and field bed three years.

KURUME AZALEAS

The Kurume Azaleas are one of the most showy of all flowers for the garden. They are also well adapted to forcing—thousands of them being sold for Easter, Mother's Day, and Decoration Day. They are comparatively easy to grow and make such a wonderful display that the demand is constantly increasing. Many of the varieties are hardy out-of-doors as far north as Long Island. They are extremely floriferous, and in season, the blossoms completely cover the plants. The colors are almost every hue and shade except yellow, as you will find below.

1 to 5 at each rate, 5 or more at the 10 rate, 25 or more at the 100 rate, 250 or more at the thousand rate.

If a variety is listed at 10 rate and not each rate there will be an additional charge of 15 cents per plant if less than 5 are ordered.

Items marked by an asterisk (*) are classed as Lining-Out stock.

Growing Azaleas is a hobby which provides an ever increasing source of interest. There are so many species to be had and so many almost breath-taking new hybrids being produced, that one is amazed at the magnificent display that we may have with only a small space of ground and a few of the newer plants that are now being offered. If you want a stimulating (and profitable) hobby that grows more interesting, beautiful and valuable every year, then grow azaleas.

Why not offer your customers more of the newer plants? You can make more profit than with the older varieties. Many new varieties are in this list.

GABLE'S HARDIER AZALEAS

Mr. Joseph B. Gable of Pennsylvania has spent almost a lifetime working with Azaleas and Rhododendrons. Many years ago he started breeding azaleas with the hopes of producing a hardier type of evergreen azalea in a good color range than then available. He has had wonderful success and is now recognized as the leader in this field.

As to hardiness: these varieties will average hardier than Hinodegiri and Amoena and much hardier than the other Kurumes. All have lived and flowered in the open field where they have withstood temperatures of twenty below zero and more in the past few winters with only negligible injury to a few. Most of them were uninjured.

KAEMPFERI HYBRID AZALEAS				
In these new Kaempferi Hybrids—the result of crossing Kaempferi and Malvatica—there has been obtained the hardiest type of evergreen Azalea, with a good range of form and color in the flowers so far achieved. Several years' tests have demonstrated that these new Hybrids are just as hardy as Kaempferi, until now the hardiest of the evergreen sorts. In connection with these Hybrids we suggest you try out the new Gable varieties we are

FELDYK AZALEAS

From a famous grower in Holland. Introduced as "the Sweet Pea colored strain." They are crosses between Malvatica and Kaempferi and Japanese Azaleas. Have large bright colored flowers. Force easily, strong growers and very hardy. The blossoms exhibit all the delightful colors we most associate with Sweet Peas. One of the hardest evergreen types we grow.

U.S.D.A. AZALEAS

Some years ago the U.S. Dept. of Agriculture introduced a collection of Azaleas mostly from Japan. We have been growing these Azaleas many years and have selected the following varieties as the best ones in this collection. They are well worth trying.

BENI KIRISHIMA. Old rose, semi-double.

1 to 5 at each rate, 5 or more at the 10 rate, 25 or more at the 100 rate, 250 or more at the thousand rate.

If a variety is listed at 10 rate and not each rate there will be an additional charge of 15 cents per plant if less than 5 are ordered.

PERICAT AZALEAS

These are essentially for florists' use as they are not dependably hardy here, although we have been growing them outside several years.

BELTSVILLE AZALEAS

Here is a group of Azaleas originated at the Plant Industry Station of the U.S. Department of Agriculture at Beltsville, Md. These are mostly good greenhouse flowering varieties as well as being hardy in colder sections. The descriptions of the named varieties are from descriptions furnished by the U.S. Department of Agriculture.

VUYKIANA AZALEAS

A new race of large flowered Japanese Azaleas, produced by crossing hardy Azalea Malvatica hybrids with Azalea Mollis. Sturdy growers, prolific bloomers. From the information we have they are much hardier than the Kurume Azaleas. Flowers range from 2 to 2½ inches. All bloom late mid-season. Plants grow tall.

PALESTRINA. We are recommending this to use in place of Ledifolia Alba for a tall growing whitebloomer. Last season when Ledifolia Alba were both bud and bloom killed, Palestrina came through without any wood damage and plenty of white flowers. Try it for a hardier tall white.

NEW U.S.D.A. AZALEAS

The Crops Research Division of the Agricultural Research Service, U. S. Department of Agriculture, hereby releases five azaleas. These varieties were developed by B. Y. Morrison and J. L. Creech at the U. S. Plant Introduction Station, Glenn Dale, Maryland, from a series of crosses made in 1947 and designed to incorporate some of the flower qualities of the Belgian-type azaleas into the hardy Glenn Dale hybrids.

After widespread trials of 96 selections, the azaleas being released at this time are considered to be the most promising for the azalea-growing areas of southeastern United States, from Washington, D. C., to Louisiana, and for forcing in all areas.

Their significant characteristic is in the pastel coloring of the flowers and the heavy texture of the petals. Occasionally the white selections are flecked and striped with red or purple, and some flowers show an irregular degree of doubleness. They flower in the Washington, D. C., area about May 8 to 15.

Price following varieties	Each	10	100	1000
	\$1.00	\$7.50	\$60.00	

BAYOU (PI 279405). A spreading azalea with leaves narrow elliptic, slightly hairy, dark green. Flowers 2½" across, single but with occasional petaloid stamens, white with occasional scarlet flakes and stripes.

GREEN MIST (PI 279406). A somewhat upright azalea with leaves glossy, narrow elliptic, glabrous. Flowers 2½" across, single, white with a distinct greenish blotch, heavy texture to the flowers.

PINK ICE (PI 279408). A broad spreading azalea, with leaves dull green, large rather obovate, glabrous. Flowers 3" across, double, mallow purple with occasional purple flakes, smooth margins and crisp texture.

WHITEHOUSE (PI 279409). A broad spreading azalea with leaves large, dull green, somewhat obovate, slightly hairy. Flowers 3¾" across, single, white with roundish petals with somewhat wavy margins and overlapping.

We try to secure our propagating wood from only the very best type of plants, and by doing this we can furnish you stock that should be of the best that it is possible for you to get anywhere, regardless of price.

SATSUKI HYBRID AZALEAS

We are not sure of the parentage or classification of these Azaleas. Mostly Japanese names and it is easy to misspell them by sound. Will appreciate it if you can help us make the corrections. Many of these varieties we only have a few of, some we have in hundred lots or more. We hope to have descriptions for our next catalog.

HARDY WHITE AZALEA

Azalea Rose Greely, one of the best early whites, is a Gable hybrid, which is assurance, of quality, and it is extremely hardy, an important factor in Azaleas. This hardiness springs from parents, *poukhanensis* and *kaempferi*. On the great Azalea market, it is in terrific demand. The plant is low and spreading, dense, and flowers in mid-season. Individual flowers 2½ in. in diameter. See page 50.

Azaleas will grow in full sun or in shade. In the sun you will have brighter colors and growth will be shorter. We prefer a little shade if convenient. The small pot-grown plants should be planted about ten or twelve inches apart in a prepared bed consisting of about equal parts of good acid soil and peat moss or rotten leaf-mold, with about one-half shade.

Azaleas like acid soil with plenty of peat moss or leaf-mold in it. As a fertilizer rotten cow manure, cotton-seed meal and tankage are good. Use this in early spring and keep well mulched with peat moss or leaf-mold and keep the plants well watered during dry weather.

For scale and red spider use Volck, one to fifty.

If your soil is not acid enough we suggest you use Aluminum Sulphate or Sulphur.

Claims, if any, must be made immediately upon receipt of goods, and if just, made satisfactory, but in no case are we responsible for more than the purchase price of the stock in question. We will not be responsible for failure to fill orders in full or for any damage or delay to stock after delivery to the transportation company.

GLENN DALE AZALEAS

We began growing these Glenn Dale Azaleas in 1941. During the past few years, since they are becoming better known, the demand has increased rapidly. Most all the reports we get from the growers are very enthusiastic. They are doing well in some sections where the evergreen varieties were not supposed to grow.

Many who have seen our fields of these Glenn Dale Azaleas in bloom expressed their amazement and joy at their size, coloring and quantity of bloom. You folks who have been dealing with us for the past many years know we do not recommend a plant unless we really believe in it. We do suggest you try some of these Glenn Dale varieties if you can grow any of the other evergreen azaleas and while you may have some disappointments we feel sure you will be greatly pleased with their growth and beauty.

These one-like descriptions do not tell you much but we do have a special booklet that describes them much more fully. Sent on request—no charge.

Sometimes when Azalea flowers are described as striped or flaked on white they will appear as a solid color. When this occurs the branch should be cut out. This seems inherent with the variety—not any fault of the nurseryman.

Capital Letters after variety name indicate sizes available in that variety as capital B means 2 in. pot plant size, capital C means 2 yr. field beds XX trans., and so-on. We hope you will understand this system of indicating sizes as it saves a lot of space in catalog. We have been using this system for Crabapples several years and it seems to be working fine.

We will furnish one to five plants of a variety and size at each rate; five to 25 of a variety and size at the ten rate; 25 or more of a variety and size at the 100 rate.

RED LEAF JAPANESE BARBERRY

(*Berberis Thunbergi Atropurpurea*)

We have a very nice lot of Red Leaf Japanese Barberry in lining-out sizes. Last season did not have near enough to fill our orders for this but have a larger stock this season and will appreciate your orders for it.

	Each	10	100	1000
* 6 to 9 in. 2 yr. S.			\$6.00	\$ 50.00
* 9 to 12 in. 2 yr. S.			7.50	65.00
* 12 to 18 in. 2 yr. S.			12.50	100.00

AS GOOD AS CAN BE GROWN

We are exerting effort to produce the very best stock that can be grown, and in our fifty-seven years' experience we believe we have never offered bigger values than we are offering this season. Even with the short supply of Lining-Out stock we have kept our prices at a low level. We feel sure you will be more than pleased with the stock we send you if you give us your order.

We try to secure our propagating wood from only the very best type of plants, and by doing this we can furnish you stock that should be of the best that it is possible for you to get anywhere, regardless of price.

MAPLES

We like to refer you to our collection of Maples especially in lining-out sizes. We believe there will be a good demand for Maples in the future. You will notice many articles being published about them. This always creates a demand—especially when the article is good. We have tried to keep our prices reasonable. See pages 2, 3 and 4.

ALUMINUM PLANT TAGS

Very convenient to use. Lasts years. $\frac{3}{4}$ inch wide, $3\frac{1}{2}$ inches long.

Made of thin aluminum. Can be embossed with ordinary lead pencil just like writing on an ordinary wood label. Permits writing label right in field. 100 for \$3.50, 500 for \$15.00, 1,000 for \$25.00 Postpaid.

NOT OPEN ON SUNDAYS. We do not have help to dig stock on Saturdays but if you want to pick up stock on Saturday let us know long enough in advance so we can have it ready for you. Closed at 11:00 Saturdays.

Why not offer your customers more of the newer plants? You can make more profit than with the older varieties. Many new varieties are in this list.

1 to 5 at each rate, 5 or more at the 10 rate, 25 or more at the 100 rate, 250 or more at the thousand rate.

If a variety is listed at 10 rate and not each rate there will be an additional charge of 15 cents per plant if less than 5 are ordered.

AZALEA ROOTED CUTTINGS

FOR DELIVERY SPRING 1964

We can furnish the following varieties of Azalea rooted cuttings, rooted last summer and fall at \$7.50 per hundred, \$60.00 per thousand. Not less than 25 of a variety at the 100 rate. Not less than 250 of a variety at the 1,000 rate. As Azalea rooted cuttings require special care in growing, we will under no conditions be responsible for growth or any other matter after they leave our hands. Ask for special price on large lots stating varieties and quantity wanted.

"SWEETHEART" IVY

(*Hedera Helix* 238th St.) (New)

Extremely hardy Ivy discovered by the Brooklyn Botanic Garden. Heart shaped leaves. Stubby sturdy stems. Even hardier than *Hedera Helix Gracilis*, according to T. H. Everett of the Brooklyn Botanic Garden. See page 19.

NOTEWORTHY HOLLY

Abundant Fruiting

This is a good time of year to look around to see different varieties of American Holly, to judge of their qualities and desirability. We suggest one named Miss Helen. It has been found to be early fruiting with great abundance; the fruit is a fine glossy red. The tree is of conical habit (not fastigiate), densely branched, and covered with many leaves of dark green. See page 25.

NEW BEAUTYBUSH

An uncommon deciduous shrub of great value is *Callicarpa bodinieri giraldi subincanensis*, growing six to eight feet high. As compared with other species of *Callicarpa*, the height of this variety is of great importance, for it gives better display to the unique distinctive blue berries during November and December, long after the foliage has fallen. But the leaves take on, in autumn, a bright rosy purple hue, harmonizing with the colored berries. It is a plant that thrives in any good garden soil. It is well teamed Bodinier Beautybush. See page 8.

THE JACKMAN POTENTILLA

A fine, shapely, compact, bushy shrub is Jackman's variety of *Potentilla fruticosa*. It is particularly good as a low hedge. It is not yet well known, but its continuous display of strawberry-like brilliant yellow flowers, against deeply-lobed leaves, picture an extra good plant. The potentillas have long been used as a pleasing plant, but this particular variety is sure to gain many new friends. See page 33.

CHINESE MAACKIA

Summer-flowering Tree

In the months of July and August, the Maackias are striking flowering trees. The white blooms are in dense, upright clustered racemes. Not a well known tree, it always arouses inquiries from visitors. Our species at this writing is *Maackia sinensis*. This is member of the Leguminose family, recognized by close examination of the little flowers. Introduced to cultivation in 1908, it is still not grown by many. Although not so well known as Amur Maackia, the density of its flowers gives it a distinct appeal. See page 28.

SARCOCOCCA HUMILIS

Its cheerful glossy green leaves intermixed in winter with almond scented flowers and later black berries. Not much over 18" tall, and *ruscifolia* broader leaves and red fruits. See page 37.

YUCCA GLAUCA

Similar to *Filamentosa*. Foliage much narrower and more grasslike but stiff. Flowers on shorter stems and earlier than others. See page 45.

REDVEIN ENKIANTHUS

Unusual and Distinctive

In mid-May, the unique campanulate flowers, and tufted leaves, crowded and bending downward at ends of stems, make *Enkianthus campanulatus* a distinctive plant. It is always seen in the shrub border associated with other ericaceous plants, especially *Rhododendrons* and bush *Azaleas*. It likes an acid soil, though it is often found with other shrubs not strongly acid. And it likes plenty of moisture. It has reddish stems, and the flowers are red-veined. It is usually about 6 feet high. Its leaves in Autumn are gorgeous yellow, red and orange, making it one of the most brilliant of all fall-coloring plants. While it is well known to nurserymen, but is not seen as often as it might be. The flowers are very useful for arrangements. Page 15.

KALMIA LATIFOLIA

One of the most beautiful evergreen flowering shrubs, *Kalmia latifolia*, the calico bush is a glorious sight in May and June when it is a mass of charming rose-pink flowers. It thrives in a peaty soil, like other ericaceous plants, and flowers best in a sunny position. It is perfectly hardy. Page 27.

THORNDALE IVY

A new variety of *Baltic*. It has broad leaf with heavy silver vein. Much publicity has been given to its extra hardiness. We believe it has outstanding merits and will soon be well known and widely planted. See page 19.

THE AZALEA BOOK

by Frederic P. Lee

The definite work from an expert "amateur" in cooperation with the American Horticultural Society. Every aspect of culture—selection, planting, cultivation—for both backyard enthusiast and rare plant collector.—4000 species and varieties described as to source, flower type, size, color, blooming period. Richly illustrated with 6 color plates, 52 black and white photographs, also drawings. A handsome volume. 320 pages. \$8.95.

ZENOBIA PULVERULENTA

For a lime-free, well-drained loamy soil this shrub does equally well in a light or shady position. The waxy, pure white bells are freely produced in June and July and are delightfully fragrant. It is a desirable, almost evergreen, plant and received a first class certificate. See page 45.

EDCO IRON

For experimental use in the control of chlorosis (lack of chlorophyll) in azaleas, gardenias, roses, citrus crops, etc.

Results to date have shown Edco Iron to be very effective in correcting chlorosis in the above crops. Chlorosis may be caused by the excess or deficiency of several major or minor nutrient elements in the plant besides iron, and it may be caused by an excess of water or its lack, but Edco Iron commonly seems to help correct the effect if not the cause of these several conditions.

Full directions for using with each lot.

Prices: 1 lb. \$2.30; 10 or more lbs. at \$2.00 per lb.

This nursery was started just 58 years ago by the present owner. We have made many mistakes but we believe our customers will agree that we have always tried to give a dollar in value for every dollar received. This will be our aim as long as The Tingle Nursery Co. stays in business. If you have any reason for complaint, tell us.

Claims, if any, must be made immediately upon receipt of goods, and if just, made satisfactory, but in no case are we responsible for more than the purchase price of the stock in question. We will not be responsible for failure to fill orders in full or for any damage or delay to stock after delivery to the transportation company.

TELL US HOW TO SHIP, whether by express, motor truck. If by motor truck, tell us the route over which line you want delivery made. If you do not give this information we will use our own judgment as to route and methods to use. It is mutually agreed that whether you name the route or leave it to our own selection, we will not in any way be responsible for time or conditions of delivery and our responsibility ceases upon our delivery to the transportation company.

AS GOOD AS CAN BE GROWN

We are exerting effort to produce the very best stock that can be grown, and in our fifty-seven years' experience we believe we have never offered bigger values than we are offering this season. Even with the short supply of Lining-Out stock we have kept our prices at a low level. We feel sure you will be more than pleased with the stock we send you if you give us your order.

We try to secure our propagating wood from only the very best type of plants, and by doing this we can furnish you stock that should be of the best that it is possible for you to get anywhere, regardless of price.

MAPLES

We like to refer you to our collection of Maples especially in lining-out sizes. We believe there will be a good demand for Maples in the future. You will notice many articles being published about them. This always creates a demand—especially when the article is good. We have tried to keep our prices reasonable. See pages 2, 3 and 4.

AUNT MARY'S SWEET CORN

The Sweet Corn Supreme

This is the most wonderful Sweet Corn we have ever grown. One grower describes it as "the best Sweet Corn in the world."

Has the most delicious flavor and keeps a long time before becoming too hard to use. In fact, usually requires artificial heat to cure it for seed purposes.

Aunt Mary's Corn, by its excellent quality, sweetness, and flavor makes a stronger appeal to the Corn-loving public than most any other variety and that appeal continues long after you are tired of other Sweet Corns.

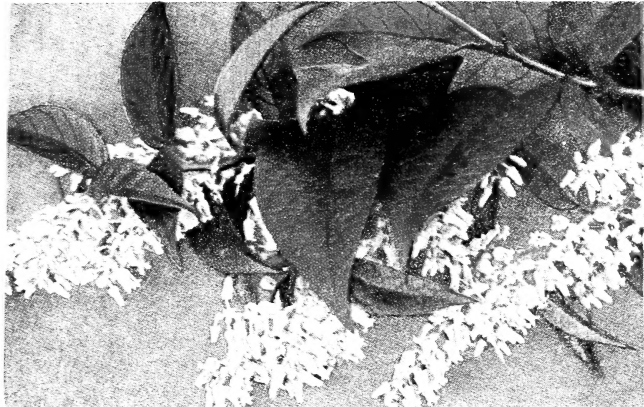

Liberal size packets, 35c each; 3 for \$1.00, postpaid.

\$2.00 per pound, postpaid.

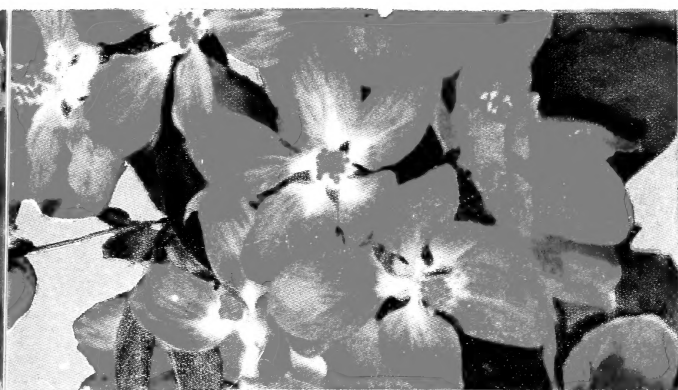

If after growing this wonderful Sweet Corn you are not entirely satisfied, we will refund every cent you paid us for it.

FRAXINUS ORNUS . . . Flowering Ash

A very desirable medium sized growing tree with lacy appearing leaves. In fall with cool weather the leaves turn a colorful yellow with a lavender cast. In May and June produces masses of bright white fragrant flowers. A very striking tree. See page 17.

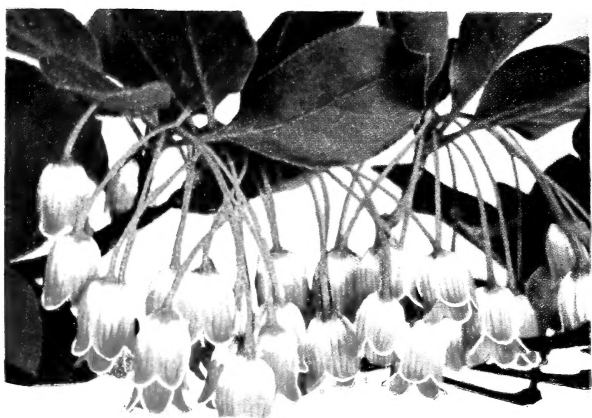

LEUCOTHOE CATESBAEI
